Hi Charles,
Thanks for reaching out. I hope Wynne is having a wonderful school year so far.

The Conservancy has been involved in a landlord tenant dispute regarding the construction the tenant is doing in the Community Center for a new restaurant space. During construction, a void under slab around a sewer line was discovered. City of Atlanta Department of Watershed Management investigated and repaired the void. The building has since been evaluated by an engineer and deemed sound. The tenant has not yet returned to work.

You can view our full statement about the Community Center on our website: <https://www.piedmontpark.org/press-room/>

I've copied Mark Banta, our President and CEO, on this email. Please feel free to reach out to me or Mark if you have any additional questions.

Thank you,

Louise Harris

Hi, I'm aware of the sinkhole issue at the Conservancy/Willie's building there at the park. Last year my daughter attended camp there. We're starting to make summer camp plans and would love to do a couple of weeks there again this summer but want to ensure the issue with the building will be taken care of by then. Thanks for any info you can provide.

Hi there, I just got the email about camp this summer which we hope to attend. However a neighbor of ours told me that there is big sink hole where the camp building is located. She stated that it was potentially quite dangerous and that some construction was halted. Had this all been resolved?

Thanks,
